Calgary City Council

Dear Mayor Gondek and Councilors,

Re: Mobility Funding for Mid-Cycle Budget Review

The communities of Marda Loop have experienced a great deal of densification and revitalization in the last decade. With these changes mobility and safety have become a concern to residents who are looking for safe, active routes to school, work, businesses and amenities. The City of Calgary is putting so much work and time into making our main streets walkable and livable streets. Given our ever-growing community, our neighborhood streets need similar attention to encourage safe walking and wheeling.

Inner-city communities that are experiencing substantial redevelopment and densification, such as those within the MLCA boundaries, need improved infrastructure that calms traffic and supports options for safe, sustainable and efficient mobility. We need to prioritize safety and accessibility to prevent traffic-related injuries or deaths and encourage all transport modes.

As you conduct your mid-cycle budget review, please consider investment in traffic-calming and active infrastructure projects that help make our neighborhood streets, pedestrian and cycling infrastructure safer and accessible for everyone.

Yours in safety,

Marda Loop Community Association
